**Reference:** T3.04/2024

**Position title:** Research Analyst Intern, FORCE Initiative

**Group:** Direction

**Job description:**

To promote a network of excellence centres in health research and to better position investigation of the Valencia region (CV) at the national and international level, the Department of Investigation and Innovation of the Conselleria de Sanidad has announced the new initiative FORCE (Fomento de Redes y Centros de Excelencia). This new project aims to coordinate and promote scientific and technological collaborations between research foundations, hospitals, and other relevant entities in the CV. FORCE will identify and create new opportunities to harness the collective power of networks to transfer laboratory results to improve healthcare for the patients.

The CIPF has a new agreement with **Johnson & Johnson** company that provides us with resources to implement actions aimed at promoting strategic alliances and research collaborations by forming an active part in FORCE which will increase the visibility and competitiveness of our institute.

The current position will support the development and implementation of the FORCE health initiative. The internship will assist with analysis of scientific production, research capacities, and assess synergies between different institutes in CV. This new, innovative initiative requires a specific set of skills of a professional profile that currently does not exist in the CIPF, and thus we are seeking a talented intern to train and perform these tasks for a period of 1 year. The duties of the research analyst trainee include:

- to assess and implement plans for establishing strategic alliances with other health research institutes or scientific entities
- to identify and provide economic analysis reports on new funding opportunities for health-oriented research at the national and international;
- to develop new tools and protocols for evaluating scientific production outputs in health-oriented institutes.

The position will provide the following benefits to the candidate:

- to gain work experience and other knowledge and skills necessary for future research or public policy positions;
- to gain knowledge of the dynamics between biomedical research and translation of knowledge to the public healthcare system
- to participate in a career development program towards the goal of becoming a more experienced, independent researcher.

### **Research Center description:**

The Prince Felipe Research Centre (CIPF) was created to develop first-rate, competitive and internationally relevant research in the fields of Cancer biology, Neuronal Pathologies, and Metabolic Disorders. The research centre, located in Valencia, occupies an area of 32,000 m<sup>2</sup> and it is equipped with the most advanced infrastructures, facilities and technological equipment.

Scientific training, collaboration, and public engagement are key activities of the CIPF. Our basic mission is to understand the cellular and molecular mechanisms of human disease and apply this knowledge to the development of innovative diagnostic and therapeutic approaches. We are firmly committed to improving the lives of patients through the translation of laboratory discoveries to the clinical setting. The CIPF training program was developed to promote excellence and attract top-tier research talent

### **Basic requirements of the position:**

At the time of application, the candidate must possess:

- At least a Master's degree or higher in public administration or health research management.
- Experience in public policy development and analysis in the health sector.
- At least 6 months of experience in a research institute
- Demonstrated experience in statistics and data analysis
- Demonstrated international training and experience
- Demonstrated knowledge of the national and European policy for public health research
- Excellent level of spoken and written English

### **Merits:**

1. Training
  - 1.1. Academic Qualifications
  - 1.2. Complementary Training
2. Experience in public policy development and analysis in the health sector sector and experience in a research institute
3. Experience in statistics and data analysis and in international training.
4. Knowledge of the National and European policy for public health research

### **Valuation criteria:**

1. Training - 15%
  - a. Academic Qualifications - 5%
  - b. Complementary Training - 10%
2. Experience in public policy development and analysis in the health sector and experience in a research institute - 20%
3. Experience in statistics and data analysis and in international training -20%
4. Knowledge of the National and European policy for public health research - 20%
5. Other considerations: Certificate of disability (equal to or greater than 33%), being a victim of gender violence - 5%.
6. Interview - 20%

## Contract

- Professional category: Licenciado/a T3
- Salary Level: (Salary level as stipulated in the Convenio de Sanidad Privada de la Provincia de Valencia).
- Funding Source/Project: **Funded by Johnson & Johnson.** The CIPF and Johnson & Johnson share similar institutional values of excellence, collaboration, innovation, and equality. Strengthening biomedical research in the Valencia region requires building effective partnerships between research institutes, hospitals, and universities as a basis for public policy strategies that will promote innovation and opportunities.
- Duration: 1 year
- Starting date: June 25, 2024
- Working day: Full-time (37,5 hours per week)
- The deadline for receipt of resumes will be open until 19th June, 2024

## Selection process:

The selection process will evaluate the applicant's achievements and capacity, as well as their work history and alignment with the strategic goals of the centre.

The system will consist in the following phases:

- 1) Phase of compliance with the requirements established in the call. Only candidates with the essential requirements will be considered.
- 2) Merit valuation phase.
- 3) Interview phase (The 3 candidates with the highest score in the merit phase will go to the interview phase)

The selected candidates will go to the interview phase.

The members of the Selection Committee receive continuous training in equality issues.

## Working conditions:

The CIPF promotes equal treatment and opportunities between women and men, which should be considered a fundamental aspect of the CIPF's labor relations and human resources management.

The CIPF is committed to reconcile a work and family life of its employees and are offering the possibility to benefit from flexible working hours.

The CIPF is committed to complying with the European Charter for Researchers and the Code of Conduct for the Recruitment of Researchers (EU Charter & Code) by developing its human resources strategy for researchers (HRS4R) and through its open, transparent, and merit-based recruitment policy (OTM-R).

HR EXCELLENCE IN RESEARCH

## ¿How to present your candidacy?

Interested candidates should send their documentation through the job portal on the CIPF website.
